Mail-Out #MSC 15-20

TO: All Interested Parties

SUBJECT: AMENDED CARL MOYER TRUCK IMPROVEMENT/MODERNIZATION
BENEFITTING EMISSION REDUCTIONS (TIMBER) PROGRAM FOR
ON-ROAD HEAVY-DUTY LOG TRUCK REPLACEMENTS

This mail-out describes the most recent revisions to the TIMBER Program Supplemental Documents. These revisions expand the TIMBER Program to include the funding of used replacement vehicles, and the funding of log trucks opted in to the NOx Exempt Area extension and the Small Fleet option. These changes also revise the funding table by using the new cost-effectiveness cap, ease inspection requirements on districts working with distant dealers, make minor additions to 4 forms at the request of the TIMBER districts, clarify documentation requirements when replacement trucks are financed, and correct minor inconsistencies and typographical errors.

The TIMBER program is a streamlined funding option for on-road heavy-duty log truck replacements under the Carl Moyer Program. The goal of the TIMBER program is to provide incentive funding opportunities to encourage early action by fleets utilizing the Truck and Bus Regulation's Log Truck Phase-In option, the NOx Exempt Area extension, and the Small Fleet option.

Each revision affects multiple sections in the Supplemental Documents. The Table below provides a description of each revision along with all sections and pages affected.
