1.0 Preface

In alignment with the SUPPORT Act and the state's focus on health equity and coverage for Justice Involved populations, in January 2023, California received approval in its five-year 1115 demonstration renewal request to authorize federal Medicaid matching funds for selected Medicaid services for eligible Justice Involved individuals in the 90-day period prior to their release from a Correctional Facility.

The scope of targeted pre-release services under the Section 1115 demonstration includes medication and medication administration consistent with the State Plan. The demonstration allows medications to be provided in the 90-day period prior to release and for a supply of medication to be provided 'in-hand' upon release. The goals of providing medication coverage during the pre- and post-release periods are as follows:

- Ensure access to medications that are traditionally difficult to obtain in Correctional Facilities (such as long-acting injectables for SUD treatment).
- Stabilize individuals with chronic conditions on medications that they will be able to access once released (i.e., medications covered by Medi-Cal) to ensure their conditions are well controlled during the immediate post-release period.
- Provide Medi-Cal Rx medications upon discharge to ensure there is no gap in access to critical medications.

Siskiyou County Public Health Division seeks to partner with a Community Based pharmacy to provide Medi-Cal Rx medications to Medi-Cal insured individuals incarcerated in its correctional facility in the 90-day period prior to release, and to provide Medi-Cal Rx medications upon discharge to ensure there is no gap in access to critical medications.

The project is expected to start on January 1, 2025.
